More than 800 Nursing Home Administrators voluntarily participated in this survey. Without their efforts, the work of the center would not be possible. The Department of Health Professions, the Healthcare Workforce Data Center, and the Board of Long-Term Care Administrators express our sincerest appreciation for their ongoing cooperation.

Thank You!

This report contains the results of the 2023 Nursing Home Administrator (NHA) Workforce Survey. More than 800 NHAs voluntarily participated in this survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place every March for NHAs. These survey respondents represent 83% of the 969 NHAs licensed in the state and 100% of renewing practitioners.

The HWDC estimates that 757 NHAs participated in Virginia's workforce during the survey time period, which is defined as those who worked at least a portion of the year in the state or who live in the state and intend to return to work in the profession at some point in the future. Virginia's NHA workforce provided 813 "full-time equivalency units," which the HWDC defines simply as working 2,000 hours per year.

Three out of every five NHAs are female, including 64% of those NHAs who are under the age of 40. In a random encounter between two NHAs, there is a 36% chance that they would be of different races or ethnicities, a measure known as the diversity index. For NHAs who are under the age of 40, this diversity index increases to 44%. This makes Virginia's NHA workforce less diverse than the state's overall population, which has a comparable diversity index of 58%. More than two out of every five NHAs grew up in a rural area, and 29% of NHAs who grew up in a rural area currently work in a non-metro area of Virginia. In total, 17% of all NHAs work in a non-metro area of the state.

Among all NHAs, 86% are currently employed in the profession, 88% hold one full-time job, and 45% work between 40 and 49 hours per week. Nearly two-thirds of all NHAs work in the for-profit sector, while another 30% of NHAs work in the non-profit sector. Skilled nursing facilities were identified as the primary work location of 52% of all NHAs, while another 18% work at an assisted living facility. The typical NHA earns between \$130,000 and \$140,000 per year. In addition, 93% of all NHAs receive at least one employer-sponsored benefit. Among all NHAs, 93% are satisfied with their current work situation, including 59% who indicated that they are "very satisfied."

Summary of Trends

In this section, all statistics for the current year are compared to the 2018 NHA workforce. The number of licensed NHAs in Virginia has increased by 6% (969 vs. 916). In addition, the size of the NHA workforce has increased by 4% (757 vs. 730), but the number of FTEs provided by this workforce has remained essentially constant (813 vs. 811). Virginia's renewing NHAs are more likely to respond to this survey (100% vs. 98%).

The percentage of Virginia's NHAs who are female has increased (60% vs. 56%), and this increase is even larger among NHAs who are under the age of 40 (64% vs. 50%). Likewise, the diversity index of Virginia's NHA workforce has increased as well (36% vs. 24%), and NHAs who are under the age of 40 have seen their diversity index increase to an even greater extent (44% vs. 25%). NHAs are more likely to have grown up in a rural area (44% vs. 41%), but NHAs who grew up in a rural area are less likely to work in a non-metro area of Virginia (29% vs. 32%). In total, the percentage of all NHAs who work in a non-metro area of the state has fallen slightly (17% vs. 18%).

NHAs are slightly less likely to be currently employed in the profession (86% vs. 87%) or hold one full-time job (88% vs. 89%), but they are more likely to work between 40 and 49 hours per week (45% vs. 41%). At the same time, the one-year rates of involuntary unemployment (1% vs. 4%) and underemployment (1% vs. 2%) have both fallen. Meanwhile, NHAs are less likely to have worked at their primary work location for more than two years (46% vs. 52%). NHAs have become more likely to work in the for-profit sector (65% vs. 61%) instead of the non-profit sector (30% vs. 35%).

NHAs are more likely to carry education debt (38% vs. 30%), a trend that has also occurred among NHAs who are under the age of 40 (60% vs. 49%). For those NHAs with education debt, their median debt amount has increased (\$40k-\$50k vs. \$30k-\$40k). The median annual income of NHAs has increased (\$130k-\$140k vs. \$110k-\$120k). However, NHAs are less likely to receive at least one employer-sponsored benefit (93% vs. 97%), including those NHAs with access to a retirement plan (68% vs. 78%). The percentage of NHAs who indicated that they are satisfied with their current work situation has fallen (93% vs. 94%), including those NHAs who indicated that they are "very satisfied" (59% vs. 68%).

New Licensees	67	7%
Non-Renewals	114	12%
All Licensees	969	100%

Source: Va. Healthcare Workforce Data Center

HWDC surveys tend to achieve very high response rates. Among all renewing NHAs, 100% submitted a survey. These respondents represent 83% of the 969 NHAs who held a license at some point in the past year.

Definitions

- 1. The Survey Period:** The survey was conducted in March 2023.
- 2. Target Population:** All NHAs who held a Virginia license at some point between April 2022 and March 2023.
- 3. Survey Population:** The survey was available to NHAs who renewed their licenses online. It was not available to those who did not renew, including some NHAs newly licensed in the past year.

Among all NHAs, 46% have worked at their primary location for more than two years.

¹ As reported by the U.S. Bureau of Labor Statistics. Over the past year, the non-seasonally adjusted monthly unemployment rate fluctuated between a low of 2.4% and a high of 3.3%. At the time of publication, the unemployment rate from March 2023 was still preliminary.
